### Delta Force

*Eastfield Rossmill, specialist installers of PA systems, have recently designed, installed and commissioned a PA system for The Royal School of Signals, Blandford camp in Dorset. Delta Sound ceiling and wall speakers were used exclusively throughout the installation.*

IT CAN  
TAKE  
WHATEVER  
THE  
TOUR  
CAN  
THROW  
AT IT

The new WMS 300 brings breathtaking UHF radio microphone performance to the road at a breakthrough price. With instant flexibility no other radio mic system can touch.

Three interchangeable dynamic and condenser heads; a choice of handheld transmitter or ballpack; and vocal, instrument or lavalier systems, let you match the microphone to the production every time.

To make life easier on the move a simple adjustment on the receiver allows you to switch to any one of 16 spot frequencies within a UHF TV channel, with the ability to run up to eight systems simultaneously without intermodulation. You get a total system solution that includes active antenna splitters and boosters and a receiver that can be run on either AC or DC voltage.

Then take a look at the exceptional features. Up to 12 hours' battery life from three AA cells, a compact XU true diversity receiver unit and, of course, AKG's precision audio quality, rugged durability and backup as standard.

Based on the hugely successful WMS 900 system (tours include Peter Gabriel, Rod Stewart, Wet Wet Wet and 1996's Simply Red dates), the WMS 300 is a total solution of a brilliant price with the handheld system starting at \$869.00. Truly a radio microphone system to take anything a tour can throw at it.
